LIGHT WORK OF IT:  
THE NEW PICARD  
790½ AND 590½**

**PICARD**

**DER HAMMER. SEIT 1857**

# LIGHTER, MORE BALANCED AND ROBUST: THE NEW PICARD 790½ AND 590½

## 1\_Head

The head is lighter and slimmer than the previous 790 and 590 models thanks to an improved design.

## 2\_Claw and point

The claw and the slim, extended point on the carpenters' roofing hammer are precisely wrought and inductively hardened. Even small nails are securely caught.

## 3\_Face

The face is carefully hardened and specially tempered; the roughened version has particularly deep checks. Also available with a plain face.

## 4\_Shaft

The construction of the forged, weight-optimised shaft provides perfect balance and supreme impact. Its carefully cut surface blends smoothly into the grip.

## 5\_PICARD quality steel

Higher grade than DIN standard C45. Longer service life for the bevel and the entire hammer.

## 6\_Leather grip

The leather grip on the solid steel handle is resistant to twisting. It not only looks good, leather absorbs moisture and releases it again once the work is done. The surface is extremely wear-resistant.

## 7\_Two-component handle

The two-component plastic handle is ergonomically optimised and designed to be vibration-damping. It makes work effortless and is extremely durable thanks to the solid join between the shaft and handle, and the robust base plate.

- + Lower weight
- + Perfectly balanced
- + Total weight just 800 g
- + 100 g lighter than the 790 and 590 carpenters' roofing hammers
- + In the same weight class as tubular shaft carpenters' roofing hammers, only much more robust
